

DRACONIS

Epic science fiction · film trilogy or series · IN DEVELOPMENT

LOGLINE

A teenage alien military officer assigned to manage Earth's enslaved humans discovers an ancient crystal technology that awakens genetic memories in both species, leading to a transformation that will either unite their civilizations or destroy them both.

THE SERIES

Set 300,000 years ago, DRACONIS follows two young people from opposing sides who discover they are part of an ancient prophecy that could heal the rift between their species.

Book One is The Awakening. The story is built in three parts, with themes of environmental restoration and a visual world grown from its "crystal-tech".
