LOGLINE

In a world teetering on ecological collapse, a brilliant but broken botanist discovers a revolutionary food source that could save humanity – but as corporations and governments move to suppress his discovery, his quest for salvation leads him down an increasingly dark path that will force him to choose between feeding the world and keeping his soul.

THE SERIES

SEED is a character-driven drama set in a near future where corporate food monopolies control global supply. It follows Dr. James Chen's transformation from idealistic scientist to revolutionary leader as his discovery threatens the global power structure.

Its themes are food security, corporate power and environmental crisis, in a story where every villain believes they are the hero.

The first season

Thirteen episodes follow Chen's discovery, first triumph and fall from grace as corporate forces move against him. The season ends with his apparent defeat and secret survival.

Audience

Adults 25 to 54 who watch premium drama.
